Inside Prince Harry and Meghan Markle's trip to Ireland

And of course, Meghan now is truly a part of that.

[Duchess Meghan is bringing the boatneck back: How you can pull off the look too](#) originally appeared on [goodmorningamerica.com](#)

Meghan Markle is bringing the boatneck neckline back in fashion.

The Duchess of Sussex has rocked the look at seven -- and counting -- official appearances, beginning with her May 19 wedding to Prince Harry.

Duchess Meghan's Givenchy wedding dress featured a boat neckline that has quickly become her signature style.

"The boatneck is a classic neckline that allows Meghan to bare some skin but not be too revealing," said Kristen Saladino, fashion director at [Good Housekeeping](#). "She is following in the footsteps of some very chic ladies: Audrey Hepburn, Princess Grace and Jackie O [Onassis Kennedy]."

Just as Meghan wears the boatneck for any occasion, you can too, experts say.

"It's the perfect balance between edgy and still sophisticated," said Melissa Garcia, an [on-air fashion correspondent, celebrity stylist and fashion expert](#).

"What's great also is that almost no woman ever says she's not confident about her collarbone and neck area, so it's a great place to be able to show a little skin," she said. "It's flattering on any woman's body shape and size and a trend any woman can embrace and wear."

The only mistake a woman can make when wearing a boatneck is to show her bra straps, according to Saladino, who recommends wearing a strapless undergarment in order to "keep the neckline clean."

Garcia also recommends keeping the neckline clean by skipping a necklace and making the boatneck silhouette your statement.

While the boatneck look is often seen on A-line styles, like Meghan has worn, Garcia thinks the exposure will bring a resurgence of boatneck to more casual styles.

"Now that Meghan bringing it back in the fashion forefront I do think we'll be seeing different variations of it," she said.
